Dear Cr Vicki Howard

On Monday I rang your office and spoke to a lady (unfortunately I have forgotten her name) about the recently installed pedestrian refuge island on Macquarie St at the intersection of Florence St. This refuge island is of massive benefit to people on foot but due to the way it has been installed it now creates a nasty pinch point for people on bicycles using the road. Can you please advise who we can speak to on how the pinch point can be resolved without removing the island.

Sincerely

Donald Campbell
