Dear Councillor Howard

The CBD BUG is contacting you regarding the recent development application (A006618899) by Howard Smith Wharves (HSW) to undertake changes to the development.

Being the local Councillor you may be aware of the same issues the CBD BUG has identified regarding the (shared use) active transport corridor through the development. These issues include the current development transport corridor being a source of conflict and confusion between people on foot and on wheels and the need for this situation to be improved.

As per our submission to the development application (of which you are in receipt) the existing shared path is not compliant with current engineering guidelines from the Department of Transport & Main Roads and/or AustRoads. The current development application provides an opportunity for this issue to be resolved by HSW. Unfortunately, HSW continue to propose an active transport corridor that is not in compliance with TMR/AustRoads guidelines.

On behalf of our members, we would appreciate understanding your position on this issue and whether you support infrastructure being provided that does not accord with existing best practice guidelines for active transport.

Looking forward to your reply

Yours Sincerely

Donald Campbell
